Our MFM alumni testify

"When I started the MFM program at Vlerick, I thought I wanted to go in trading or work for one of the big banks. However, during the program, I learned more about corporate finance, the current evolution in banking regulation, entrepreneurial finance, etc. This changed my view on what I wanted to do in my professional career and I decided to join a scale up in the fintech lender sector."

Elodie Vanden Avenne - MFM 2019 - Associate Investors & Operations Team at Fiduciam

"Vlerick can't be taken out of who I am today. For sure, we learn a lot of technical skills and we become adept to solve the most complex finance cases. But this is just the tip of the iceberg. Underneath, we grow as a person. Before joining Vlerick, I did not have a clear idea about the different career paths and the full spectrum of possibilities. So, Thanks to Vlerick career events, I am now fully aware about my destination, and about what it takes to achieve it."

Issam Lachab – MFM 2017 - Upstream Europe Gas Market Optimization & Trading Analyst at ExxonMobil
